Reasons for allowance

1. This communication is in response to applicant's 10/06/2006 Amendment after the Final in the application of Benvenuti et al. for an "Transparent error count transfer method and apparatus" filed 09/25/2001. This application claims Priority from Provisional Application 60307372 filed 7/25/2001. The proposed amendment to the claims and response have been entered and made of record. Claims 1-4, 8-21, 23-25, 27-33 have been canceled per Applicant's request. The claims have been amended to better point out and more distinctly claim subject matter comprising the invention.
2. Claims 6, 5, 7, 22, 26 are allowable as evident by applicant's amendment (Claims are renumbered as 1-5 respectively).
3. The following is an examiner's statement of reasons for allowance: The closest prior art of record fails to disclose or suggest the steps of determining a synchronization status/channel identification bit pattern representative of the indication of synchronization status/channel identifier, and inserting the synchronization status/channel identification bit pattern into the transport overhead for the high-speed frame, where the synchronization status/channel identification bit pattern is inserted in at least one portion of the transport overhead and where the at least one portion is unused according to the standard that defines the high-speed frame. The closest prior art of record fails to disclose or suggest whether receiving an indication of a quantity of errors associated the high speed-frame, and wherein determining the error count quantity is further based on the indication of the quantity of errors associated with high-speed frame, as specifically recited in the claims
